MCAS - How to get access

- Download the "My Child At School" app from an app store.
- The school created user accounts for all parents/carers at the start of the year and sent an invite email to MCAS to the registered email address. You need to either find this email or if you have not got the invite email, or the link has expired, please email info@glossopdaleschool.org.uk to ask for the IT team to generate a new password email for you
- You need to click the link in the email to access the "Create Your Password" screen for MCAS, then follow the instructions to make a password.
- You will then be able to open the app and log in with the registered email address and the password created.

Thank you.
